Dr. James L. Charles
Director of Research
Philip Morris U.S.A.
Post Office Box 26583
Richmond, Virginia 23261

Dear Dr. Charles:

We have reviewed the experimental program presented by
DEU. Howell and Dobbs on February 19th and are pleased to offer
the enclosed proposal for your consideration. Basically, what
we propose is to conduct the 32 extraction experiments outlined
on the sheet provided to us on February 19th. As discussed,
these experiments will be conducted on one of our extraction
units, specifically modified for Philip Morris's program. All
extracts, exhausted substrates and unprocessed materials will be
returned to Philip Morris by overnight air service. No
analytical work will be conducted by Supercritical Processing,
Inc. (SCP) on any samples, with the possible exception of
moisture analyses before and after extraction. In addition to
providing all fractionated materials, SCP will provide a written
report detailing all experimental conditions and observations.

We are confident that we can assemble the necessary
equipment and be prepared to commence work within four weeks of
the execution of an agreement, and anticipate that we can
complete the experimental program in a six week period with a
written report delivered two weeks after the conclusion of the
experimental program.

We hope that you will find this proposal satisfactory and
that it will form the basis of a long and mutual
relationship. We have attempted to respond to
requests for confidentiality and exclusivity, competently conducted experimental program. A
this proposal, please contact Zvi or myself if
questions or comments.

Sincerely,

Raymond
